RE: Changes in Forensic Science/Biochemistry major and minor due to the dropping of CJ 221 Financial Investigations.

For your information:

For the major: We have dropped CJ 221 from the list of elective courses allowed for the major.

For the minor: CJ 221 was one of 2 choices allowed as an elective course for the minor. Rather than not give students a choice for an elective course we have changed the elective option to : "One additional Biol/Chem/CJ course chosen from the required or elective courses for the Forensic Science/Biochemistry major."

If I need to do anything else let me know.
